Circulating Hose Loop

Circulating hose loop can handle fluids at a cold working pressure from 5,000psi to 15,000psi for high-pressure discharge application. Circulating hose loop is made from high quality alloy steel, and MPI tested, all materials for circulating hose loops meet ASTM or AISI standards, and cover sizes from 2" to 3". Three lengths of hose loop are available as follows: 1.50m, 2.00m, 2.50m which can be used to replace FMC circulating hose loop or SPM circulating hose loop.

Special purpose hose loops can be available as per requirements.
